The Digital Dilemma

Today's internet: A rented space

- **Vendor lock-in:** Businesses are trapped in centralized cloud silos (AWS, Azure, Google Cloud).
- **Data is a commodity:** User data is the product. Your insights, your customers, your privacy... are not your own.
- **Lack of control:** A single platform can change its terms, de-platform you, or suffer a catastrophic failure, taking your business down with it.
- **True independence is an illusion.**

The New York Times

Amazon Outage Forces Hundreds of Websites Offline for Hours

Amazon Web Services, a major provider of cloud services, cited a problem at its data center in Northern Virginia. The outage highlighted the fragility of global internet infrastructure.

A Simple Analogy

Imagine your own secret notebook. A high-quality, secure, locked notebook or journal.

- SOVERI is like your own secret notebook on the internet.
- In this notebook, only you and the people you trust can write, draw, or keep notes.
- Nobody else - not big tech, not advertisers, not even us - can peek inside or erase your work.
- It's kept in a magical, decentralized place that keeps it safe and makes sure it's always there when you need it.

Our Foundation: The Internet Computer

The "magical place" is real. We build on the Internet Computer - a revolutionary public blockchain that extends the internet itself. It's not just for transactions; it is the new internet.

- **Truly decentralized:** Runs on a network of independent, sovereign nodes.
- **Web-speed performance:** Runs applications and smart contracts at the speed of the web.
- **Unmatched security:** Tamper-proof and unstoppable. Your code is the law.
- **Infinite scalability:** Scales to meet any demand without legacy infrastructure.

The SOVERI Difference: A Full-Stack Sovereign Approach

We are architects of a sovereign internet. We don't just build on the platform. We are full-stack architects, from the hardware to the user experience.

1. **Sovereign node infrastructure:** We utilize independent ICP nodes, ensuring a physically decentralized and resilient foundation, right here in Europe.
2. **Internet Computer network:** We leverage the full power of ICP for web-speed, secure, and scalable solutions.
3. **End-to-end dApp development:** From backend smart contracts (canisters) to beautiful front-ends, our team builds your entire application.

Our Solutions (1): Sovereign Websites

Your Digital Embassy: Unstoppable & secure. We build secure, 100% on-chain static websites that are completely independent of traditional hosting.

- **Unstoppable:** No central server to hack or shut down.
- **Secure:** Data integrity is guaranteed by the blockchain.
- **Independent:** Free from AWS, Google, or other central points of failure.

Our Solutions (2): Public & Private dApps

Your sovereign tools: Built for your needs. We build custom decentralized applications (dApps) that put you in control.

BeProActive

- **Public dApps:** e.g. BeProActive. A privacy-focused fitness tracker. The application is public, but your health data remains 100% private and owned by you.
- **Private dApps:** e.g. The SOVERI platform. An internal tool for secure project management and customer support.

Our Solutions (3): IC Academy

Building the future together: With the support of the IC Academy

- **Empowering developers:** We are committed to growing the ecosystem.
- **Skills for the future:** Our IC Academy provides the training and skills needed to create sovereign applications on the Internet Computer.
- **Building a Community:** We are fostering the next generation of sovereign architects.

Why SOVERI?

Your partner in digital sovereignty:

- **True control:** From the node to the UI, you own and control your entire stack.
- **Unbreakable security:** Built on the world's most advanced, tamper-proof blockchain.
- **One-stop expertise:** We are your single partner for full-stack, end-to-end decentralized development.
- **European foundation:** Resilient, decentralized infrastructure with a European focus.
- **Proven & trusted:** Powered by samlinux development and a proud member of the ICP Alliance.

SOVERI Product Suite

The era of sovereignty is here. Don't just rent your digital future. Own it.

Websites	<p>Static Websites</p>					<p>Education</p>			
Public dApps	<p>Fitness Tracking</p>								
Private dApps	<p>Project Docu Management & Customer Support</p>								
ICP Smart Contract (Canister)	Data	Backend	Token Ledger	API/Middleware	Front End				
ICP Compute Network	Digital Identity & Verified Credentials		Governance & Policy Framework		Full Stack sovereign and secure computer				
 INTERNET COMPUTER									
Sovereign node infrastructure									

Contact

Let's build your sovereign foundation. Talk to us about:

- Securing your digital presence with a sovereign website.
- Building a custom, private dApp for your business.
- Migrating your services to a platform you truly control.
